

2011-2012 HUNTING SEASONS

WHITE-TAILED DEER

Deer Management Zone 1

Private and open public lands east of I-55 and north of I-20 plus areas south of I-20 and east of U.S. Highway 61, excluding areas south of U.S. Highway 84 and east of MS Highway 35.

Deer Management Zone 2

Private and open public lands south of U.S. Highway 84 and east of MS Highway 35.

Deer Management Zone 3

Private and open public lands west of I-55 and north of I-20 plus areas south of I-20 and west of U.S. Highway 61.

LEGAL BUCKS			
Zone	Inside Spread	OR	Main Beam
1	10"	OR	13"
2	10"	OR	13"
3	12"	OR	15"

Bag Limits

Antlered Buck Deer: The bag limit on antlered buck deer is one (1) buck per day, not to exceed three (3) per license year. Legal bucks must meet the antler criteria within the appropriate deer management zone. For youth hunters fifteen (15) years of age and younger, hunting on private land and authorized state and federal lands, one (1) of the three (3) buck bag limit may be any antlered deer.

Antlerless Deer: The bag limit on antlerless deer is one (1) per day, not to exceed five (5) per license year.

Spotted Fawns are not to be killed or molested at any time.

Legal Bucks

Zones 1 and 2

A legal buck is defined as having EITHER a minimum inside spread of 10 inches OR one main beam at least 13 inches long.

How to estimate a 10 inch inside spread:

Estimating a 10 inch spread is accomplished by observing a buck's ears in the alert position. When in the alert position, the distance from ear-tip to ear-tip measures approximately 14 inches. If the OUTSIDE of each antler beam is 1 inch inside the ear-tip, the inside spread is approximately 10 inches.

How to estimate a 13 inch main beam:

To estimate a 13 inch main beam, the buck's head must be observed from the side. If the tip of the main beam extends to the front of the eye, main beam length is approximately 13 inches.

10" Inside Spread

13" Main Beam

Zone 3

A legal buck is defined as having EITHER a minimum inside spread of 12 inches OR one main beam at least 15 inches long.

How to estimate a 12 inch inside spread:

Estimating a 12 inch spread is accomplished by observing a buck's ears in the alert position. When in the alert position, the distance from ear-tip to ear-tip measures approximately 15* inches. If the OUTSIDE of each antler beam reaches the ear-tip, the inside spread is approximately 12 inches. Therefore, if the outside of both antler beams reach the ear tips, the buck is legal.

*Due to body size differences in Zone 3, ear-tip to ear-tip measurements are slightly larger compared to Zones 1 & 2.

How to estimate a 15 inch main beam:

To estimate a 15 inch main beam, the buck's head must be observed from the side. If the tip of the main beam extends between the front of the eye and the tip of the nose, main beam length is approximately 15 inches.

12" Inside Spread

15" Main Beam

DEER MANAGEMENT ZONE 1

Private and open public lands east of I-55 and north of I-20 plus areas south of I-20 and east of U.S. Hwy. 61, excluding areas south of U.S. Hwy. 84 and east of MS Hwy. 35. **A legal buck is defined as having EITHER a minimum inside spread of 10 inches OR a minimum main beam length of 13 inches.**

Method	Season Dates	Legal Deer
Archery	Oct. 1 - Nov. 18, 2011	Antlerless Deer & Legal Bucks on private and open public land.
Youth Gun	Nov. 5, 2011 - Jan. 31, 2012	Antlerless Deer & Legal Bucks on private and authorized state and federal lands. Youth 15 and under.
