

AdvanceTEC

Advanced Technology, Engineering & Construction

AdvanceTEC is a cleanroom contractor with separate and distinct experience in both the microelectronics/semiconductor and biotech/pharmaceutical markets. It has extensive staff experience in designing, constructing, and installing cleanrooms, laboratories, process systems and equipment for each industry and related technologies.

Its unique experience background benefits its clients significantly. In addition to its construction services, it has an extensive resume in process tool installation, cleanroom retrofit projects, and sustaining work contracts. AdvanceTEC has evolved to serve selected owners, that support the industries they service, or to assist design for General Contractors and Engineering Firms, which are seeking to streamline the cost of construction.
